

Pigs: Dry sows

Welfare Outcome Assessment

Farm		Date	
-------------	--	-------------	--

last 12 months

Mortality	Deaths (not actively culled) %		Predominant mortality cause	
	Culls (%)			

Pen ID	1	2	3	4	5
Total number of pigs in pen					
No. Pigs assessed in pen					

Pen measures:

Enrichment use: Include sitting/standing (not lying, eating or drinking) pigs

No. Pigs using substrate / objects provided as enrichment					
No. Pig manipulating other pigs / pen equipment / floor / muck					
No. Pigs stone chewing					

Nose Ringing (Y/N)					
---------------------------	--	--	--	--	--

Tail docking					
---------------------	--	--	--	--	--

1 = undocked / 2 = long (<50%) docked / 3 = short (>50%) docked / 4 = Mixed dock lengths / 5 = Mixed undocked / docked

Ear Biting (Y/N)					
-------------------------	--	--	--	--	--

Flank Biting (Y/N)					
---------------------------	--	--	--	--	--

No. pigs needing further care (from across pens 1-5 + any others seen on farm)	Please include pig or pen ID
---	------------------------------

Reasons for further care	
---------------------------------	--

Reason for further care: L = lameness / TB = severe tail biting / TI = severe traumatic injury / U = umbilical hernia / RP = rectal prolapse / UP = uterine prolapse / O = other (specify)

Hospital Pens					
Lameness		Thin sows		Skin conditions	
Shoulder lesions		Vulva lesions		Leg swellings	
				Body wounds	
				Other (please specify)	

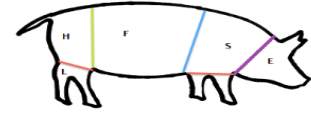

General Comments:

Total no. pigs pens 1-5									
Total no. Pigs assessed pens 1-5									
Total no. Pigs manipulating enrichment									
Total no. Pigs manipulating other									
Total no. Pigs stone chewing									
Nose Ringing									
Undocked pigs present?	<table border="1" style="width: 100%;"> <tr> <td style="width: 50px;">Y</td> <td rowspan="2" style="width: 50px;">Docked pigs present</td> <td style="width: 50px;">long</td> </tr> <tr> <td>N</td> <td>mixed</td> </tr> <tr> <td colspan="2"></td> <td>short</td> </tr> </table>	Y	Docked pigs present	long	N	mixed			short
Y	Docked pigs present	long							
N		mixed							
		short							
Ear-Biting									
Flank Biting									
Total pigs needing further care (from across pens 1-5 + any others seen on farm)									

Individual measures:

Body regions (If >25% with marks): Shoulder (S); Hindquarters (H); Legs (L); Flank (F); Ears and Head (E); General, if there is no obvious pattern (G).

d = too dirty to assess
